NEW MORSØ 7900 SERIES

2012 - 2013

## MORSØ 7900 - A CHOICE FOR LIFE...

"With the 7900 series, Morsø has worked with the designer Monica Ritterband to develop and create a new series of cast iron wood-burners, whose functionality and design suit any home - and of course with quality as the key.

The 7900 series is an innovative design based on a modular system, that makes it possible to customise each wood-burning stove to suit individual needs, both in terms of design and functionality.

Morsø has yet again gone the extra mile in their uncompromising efforts to make fire a natural, decorative and aesthetically integrated part of the comfort and warmth of our homes. Morsø has created a stove which in the smallest detail shows that it has been well thought out.

The first impression is of its large viewing glazed area.

The very large panes in the front and sides of the stove quite naturally bring the play and life of the flames into the surrounding environment, because the fire is equally visible from all parts of the room, even the sides.

The interior of the stove has also had a delicate lift.

The stones in the firebox - the vermiculite - have been coated in a soft anthracite grey colour, which makes the flames stand out more clearly and more brightly, while making the stove a stylish and harmoniously coloured feature in the room. In addition to the cosmetic lift, the stone mass also significantly increases the robustness and solidity of the firebox.

Another particularly pleasing detail is the newly designed door system, with the door sliding into place with a gentle and exclusive sigh. The handle of the stove enhances the clean and simple lines with a suggestion of cosiness and a hint of the good old days, and the small air inlet lever matches the handle and forms a specially moulded design element that fits naturally and comfortably in the hand. Both handles are specially designed by Morsø in stainless steel.

*"I wanted to create a stove that could be a well-loved feature in most homes. One that could suit anywhere from an ultra sharp designer home with a few selected pieces to a romantic layout in which several generations' furniture has come together ... and on into wider diversity."*

*Monica Ritterband*

making life warmer

Morsø has with the **7900 series** created an entirely new series of stoves, whose sharp design manages to suit most homes. A series of stoves whose smallest detail shows a tireless ability to empathise and will to embrace diversity.

**7940**

EN13240 and Norwegian approved

Rated Output . . . . . 7.3 kW

Clearances to combustibles:

Top . . . . . 500 mm

Rear wall . . . . . 125 mm

Side wall . . . . . 700 mm

Soft Furniture . . . . . 900 mm

Efficiency gross/net . . . . . 79 / 71.9%

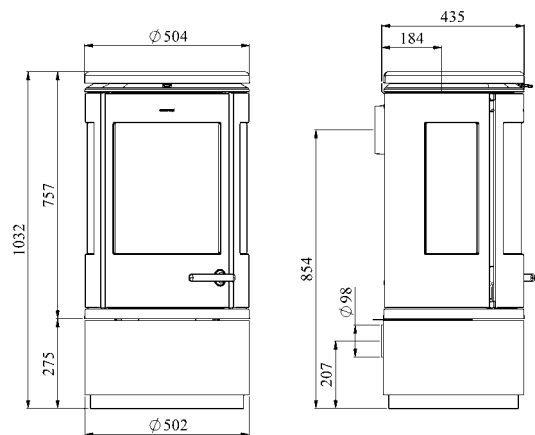

Heats up . . . . . 45-120 m<sup>2</sup>

Flue outlet top/rear option, fits to . . . Ø 150 mm

Log size . . . . . 33 cm

Weight . . . . . 152 kg

Prepared for outside air kit from the rear and the base of the stove. Airtight box can be bought separately,

 Weight 7943. . . . . 162-174 kg  
 Prepared for outside air kit from the rear and the base of the stove. Airtight box can be bought separately

MORSØ 7943 WITH PLAIN BASE

Morsø 7943 is also available with a drawer or log store

**Morsø 7948** lightly and elegantly raises the firebox, enclosed by the spectacular side and front panels. Alone in the 7900 series, the Morsø 7948 is available in both black and brown versions. Morsø has used the warm brown colour to give the cast iron a soft and living shade, which beautifully sets off the golden glow of the flames.

Flue outlet top/rear option, fits to . . . Ø 150 mm

Log size . . . . . 33 cm

Weight<sup>1</sup>. . . . . 189 kg

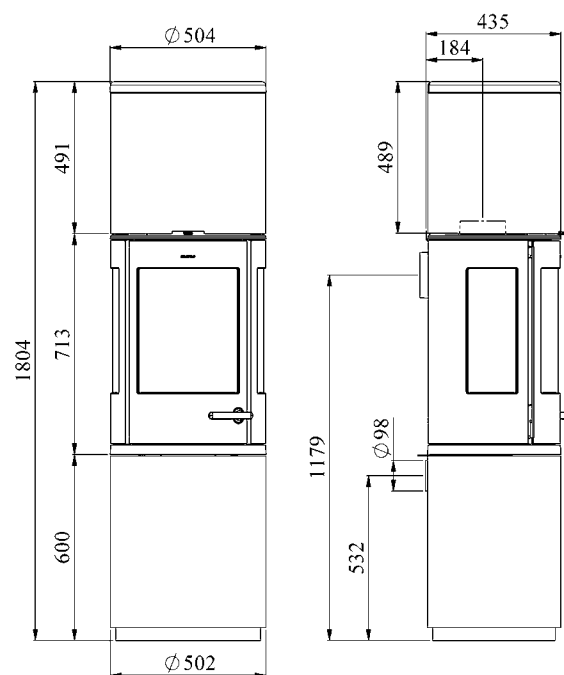

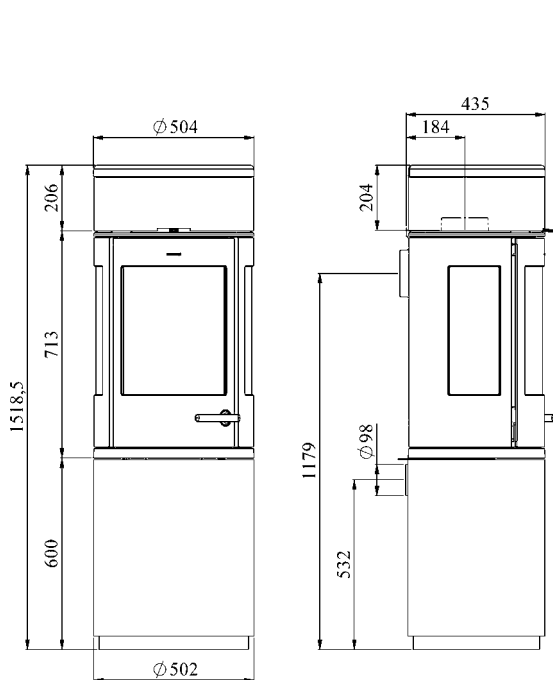

Weight<sup>2</sup>. . . . . 200 kg

Prepared for outside air kit from the rear and the base of the stove. Airtight box can be bought separately.

<sup>1</sup>MORSØ 7990 WITH LOW TOP AND PLAIN BASE

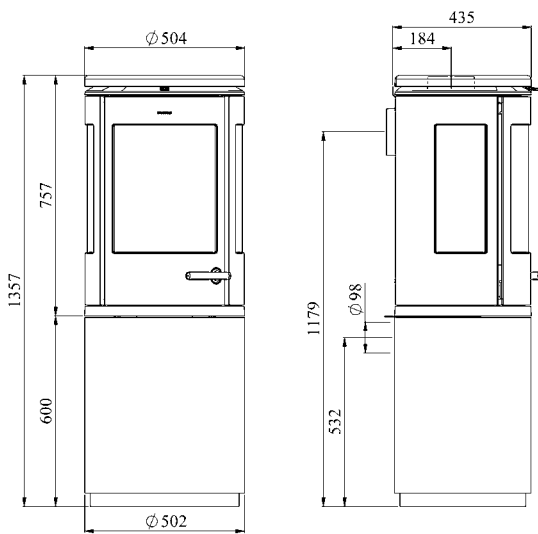

<sup>2</sup>MORSØ 7990 WITH HIGH TOP AND PLAIN BASE

Morsø 7990 is available with a drawer and log store

**Morsø 7900-serien** series is light and elegant whatever combination of stove modules is chosen. This not least because the designer, Monica Ritterband, has used the small recessed plinth to visually raise the stove, so that the pure and solid cast iron is experienced as light and almost hovering.

Morsø 7990

**Morsø 7900 - Air intake.** Specially designed and moulded in stainless steel.

**Morsø 7900 - Drawer.** Elegant and discreet storage solution

## CURVA

- Poker
- Fire Tools  
(dish . dustpan . broom)
- Felt Basket

With "CURVA", Morso has created a functional and aesthetically beautiful piece that encompasses all the fire tools in such a way that each product in the series has its own function, and nothing is superfluous.

The dish stores the firelighters, the dustpan holds the brush and also forms the lid of the dish, the poker fits behind the oven with the aid of a magnet, while the basket stores the firewood.

"CURVA" was designed by Josefine Bentzen, whose passion for the Scandinavian design tradition creates new Nordic product designs. Her work is characterised by people always being the starting point for the functionality, ergonomics and aesthetic appearance of the products.

If you ask 100 random Danes to name a make of wood-burning stoves, more than 90 of them will say "Morso" without hesitating.

- And with good reason. For generations, Morso has been the epitome of Danish wood-burning stoves, in which design, function and quality go hand-in-hand. In a nutshell, the quite unique properties of cast iron combined with innovative design.
